<https://github.com/Jyotishna0212>

I specialize in building dynamic web applications and delivering hands-on training in modern technologies like React, Node.js, IBM Cloud, and machine learning. With a strong focus on bridging the gap between knowledge and application, I enjoy creating impactful solutions and mentoring others to excel in real-world scenarios. Coding and teaching are my passions, and I thrive on combining technical expertise with practical insights.

Skills

- **Programming Languages:** Python, JavaScript, C++
- **Web Development:** HTML, CSS, JavaScript, React.js, Node.js, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Version Control:** Git, GitHub
- **Cloud Computing:** IBM Cloud (Watson Services)
- **Deployment:** Docker, Continuous Integration/Continuous Deployment (CI/CD)
- **Others:** Basic Machine Learning knowledge

Projects

Home Automation System

Description:- When it comes to home appliances, IoT is a smart, automated system. With the help of IoT-based automation systems, users can control and monitor their home stuff anywhere in the world.
Tech used:- esp8266 module, relays, Arduino IDE, IFTTT, Blynk cloud, google assistant ,Alexa , lights, fans, etc.

Credit Card Fraud Detection

Built a machine learning pipeline to detect fraudulent credit card transactions.
Preprocessed real-world datasets, trained models like Random Forest, and achieved precision. Utilized Python, Pandas, and Scikit-learn for implementation.
